

Newsletter Nr. 3

October 2017

Dear readers,

Welcome to the third edition of the HIRMEOS newsletter. The HIRMEOS newsletter keeps you updated about developments in the project *High Integration of Research Monographs in the European Open Science infrastructure* (HIRMEOS).

The first major technical improvement of the publishing platforms involved in the project has been achieved. The Work Package lead by the *Greek National Documentation Center (EKT)* has enabled four of the five book platforms (Ubiquity Press had already implemented) to develop identification services with shared standards. The platforms can now add unique identifiers to documents (DOI) and their authors (ORCID) and link them to research projects (Fundref). Enabling crosslinking on books, HIRMEOS project facilitates users navigating between documents and between documents and data.

Sincerely,

Andrea Bertino

Identification Standards Implemented!

Identification

Services: Standards Implemented!

The first major technical improvement of the publishing platforms involved in the project has been achieved. The Work Package lead by the Greek National Documentation Center (EKT)

has enabled four of the five book platforms - Ubiquity Press had already implemented - to develop identification services with minimum shared standards. The platforms can now add unique identifiers to documents (DOI) ...

Conferences and Presentations

HIRMEOS at COASP in Lisbon

"The Open Access Scholarly Publishers Association (OASPA) is a trade association that was established in 2008 in order to represent the interests of Open Access (OA) publishers globally in all scientific, technical and scholarly disciplines. This mission is carried out through exchanging information, setting standards, advancing models, advocacy, education, and the promotion of innovation." OASPA organized in Lisbon (Portugal) the 9th ...
